Abstract

Function g can be thought of as a translated (shifted) version of $f(x) = x^2$.

Write the equation for $g(x)$.

Naoya read a book cover to cover in a single session, at a rate of 55 pages per hour. After reading for 4 hours, he had 330 pages left to read.

How long is the book?

How long did it take Naoya to read the entire book?

Linear models example 1

t (hours) | L (pages)

0	550
1	495
2	440
3	385
4	330
5	275

$\Delta L = -55$ pages

$\frac{330 \text{ pages}}{55 \text{ pages/hour}} = 6 \text{ hours}$

So Khan Academy's SAT Reading resources do a pretty thorough job of covering the topics ACT Reading tests, however; there are a few differences between the Reading sections of the two exams. Unfortunately, there is currently no official Khan Academy AACT test prep , however; students planning on only taking the ACT can still use and benefit from Khan Academy's resources, including the SAT prep resources. Want more information on ACT Science? AOur guide goes over everything you need to know to ace the ACT Science section. Khan Academy Resources You Can Use for ACT Math The SAT Math section emphasizes algebra more than ACT Math does, so Khan Academy's SAT prep resources, specifically the Heart of Algebra and Passport to Advanced Mathematics sections, have a lot of material to help you study algebra. The section includes five essays or passages, each accompanied by a series of questions. Want to improve your ACT score by 4 points? A Check out our best-in-class online ACT prep program. If you're seeing this message, it means we're having trouble loading external resources on our website. Check out our 5-day free trial: Usage and Mechanics tests your knowledge of A Grammar, punctuation, usage, and sentence structure, while Rhetorical Skills tests "bigger picture" ideas such as the ideas, style, and organization of each passage. Khan Academy does have a science section with videos on numerous scientific subjects, but this isn't much use to you because it mostly covers scientific facts you don't need to know for the ACT. You can get some practice by answering SAT questions that include charts, graphs, and data analysis, but to be fully prepared for ACT Science, you'll want to spend time studying resources specifically focused on the topics this A Section tests. How is this possible when they are two different tests? Beyond the SAT prep resources, Khan Academy also has other grammar "Arts and Humanities." These videos focus on parts of speech, punctuation, and syntax, and they're a good resource to start with if you want to brush up on your grammar before answering practice questions. There are also two differences to note between SAT Math and ACT Math that you might be confused by if you use the SAT prep resources. There are seven passages on ACT Science, and these passages could contain graphs, charts, diagrams, experiment summaries, or conflicting viewpoints from multiple scientists. The ACT asks similar types of questions on each of its exams, and by knowing different strategies, you can tackle specific problems faster and more easily. Wondering if you should take the ACT Writing section? ACheck out our guide to learn how to decide what to do. How to Use Khan Academy to Prepare for the ACT For full details on how to set up an account on Khan Academy and navigate its resources, check out our guide on how to get the most out of Khan Academy. AAfter setting up an account (it only takes a few minutes), youcAAll be able to choose which subject you want to start studying. Spelling, vocabulary, and obscure grammar rules are not tested on ACT English. Our program is entirely online, and it customizes your prep program to your strengths and weaknesses. To learn these strategies, you'll need to use prep materials specifically designed for the ACT. What Is Khan Academy? However, ACT English does include main-idea questions, which you won't see covered on Khan Academy, so if you want more practice with those, be sure to use other .ACT-specific resources (discussed more at the bottom of this article). This meansA Ayuu can use all of Khan Academy's SAT Reading resources to help you prepare for ACT Reading. This is also good because Khan Academy doesn't have any general resources on improving critical reading skills, so only their SAT resources are relevant for prepping for ACT Reading. The writing of ACT writing, writing is an optional section where you will be given 40 minutes to write a persuasive essay. What's next? In the act, you can (and it is likely to be outlet throughout

the passage by passing the question to the question, so it may be well prepared for the act and vice versa. There is only one fog of Trigonometry questions about the law of mathematics, but still prepare for them by reviewing the additional topics in the section of mathematics in SAT resources and trigonometry videos under the Mathematical Resources of Khan Academy. The SAT It does not have a science section, so the questions that prove some of the same science testing of the skills law extend over other sections. Its orders are in mathematics, but they also have Lessons about other subjects Exams It is actually, as parts of speech and grammar. Help become familiar with the way the words of the words of the act and how those questions differ from the SAT. Both exams prove mathematics, science, critical reading and writing and language skills. This means that much of what you study for the SAT, including the resources of Khan Academy, will be useful for the act and vice versa. Unfortunately, there is currently no official preparation of the Khan Academy Law; However, students still can use Khan Academy's resources to help them prepare for the act. Unlike proved specific facts or topics, the science of the act examines its knowledge of scientific skills, such as data analysis, the evaluation of the hypothesis and how to summarize the investigation.
